

Trees Listed in the Field Notes of 1822

	Tree names used in 1822	# of times listed in the Field Notes	Common current name	Latin name
1.	cedar	291	Eastern white cedar	<i>Thuja occidentalis</i>
2.	elm	221	White elm	<i>Ulmus americana</i>
3.	maple	218	Sugar maple	<i>Acer saccharum</i>
4.	beech	214	American beech	<i>Fagus grandifolia</i>
5.	spruce	210	White spruce	<i>Picea glauca</i>
6.	hemlock	200	Eastern hemlock	<i>Tsuga canadensis</i>
7.	ash	189	White ash	<i>Fraxinus americana</i>
8.	bass	165	American basswood	<i>Tilia americana</i>
9.	birch	163	Yellow birch	<i>Betula alleghaniensis</i>
10.	pine	100	Eastern white pine	<i>Pinus strobus</i>
11.	larch	73	American larch	<i>Larix laricina</i>
12.	alder	28	Alder	<i>Alnus family</i>
13.	oak	9	Red oak Bur oak	<i>Quercus rubra</i> <i>Quercus macrocarpa</i>
14.	soft maple	5	Silver maple <i>Red Maple</i>	<i>Acer saccharum</i> <i>Acer rubrum</i>
15.	balsam	4	Balsam fir	<i>Abies balsamea</i>
16.	willow	1	Willow	<i>Salix family</i>
17.	tamarack	1	American larch	<i>Larix laricina</i>
	Deciduous total	1213		
	Coniferous total	879		
TOTAL TREE REFERENCES: 2092 including 17 varieties				

Geography in the Field Notes of 1822

	231 words describing water	# of times listed in the Field Notes	Geographic related definition
	[beaver] pond	8	an area of water upstream of a beaver dam which, when abandoned later, will turn into a beaver meadow
	Castor River	20	a tributary of the South Nation River – named after the beaver – with four branches North, Middle, South and East
	creek	32	a natural stream of water which is often a tributary to a river
	marsh	4	a tract of soft wet land usually characterized by plants such as grasses or cattails
	spring	2	a source of water issuing from the ground
	stream	45	a body of running water such as a river or creek
	swamp also abbreviated as sw:	120	wetland often partially or intermittently covered with water - dominated by woody vegetation
	68 words describing the landscape		
	bank	11	the rising ground bordering a river or forming the edge of a cut or hollow
	beaver meadow	6	a sedge or grass-covered field which grows in the basin of a former beaver pond
	high stony land	2	
	hill	3	
	low land /low overflown land/low wet land	6	
	ravine	2	a small narrow steep-sided valley that is usually created by running water
	ridge	24	a range of hills
	swail	14	a low-lying and often wet stretch of land
	26 words describing the vegetation		
	saplings	1	young trees with trunks about 2-4 cms in diameter
	thick underbrush/undergrowth/growth	11	shrubs, bushes, or small trees growing beneath large trees in a forest
	timber	1	a general term for forest crops and stands
	windfall	13	an area in a forest where old trees have fallen down due to a storm or strong wind; important for spontaneous regeneration of forest ecosystems
	14 words describing the soil		
	blk [black] soil	1	
	fine beautiful hardwood land	1	
	sandy clay soil	1	
	stony	11	

The survey routes in the Field Notes of 1822

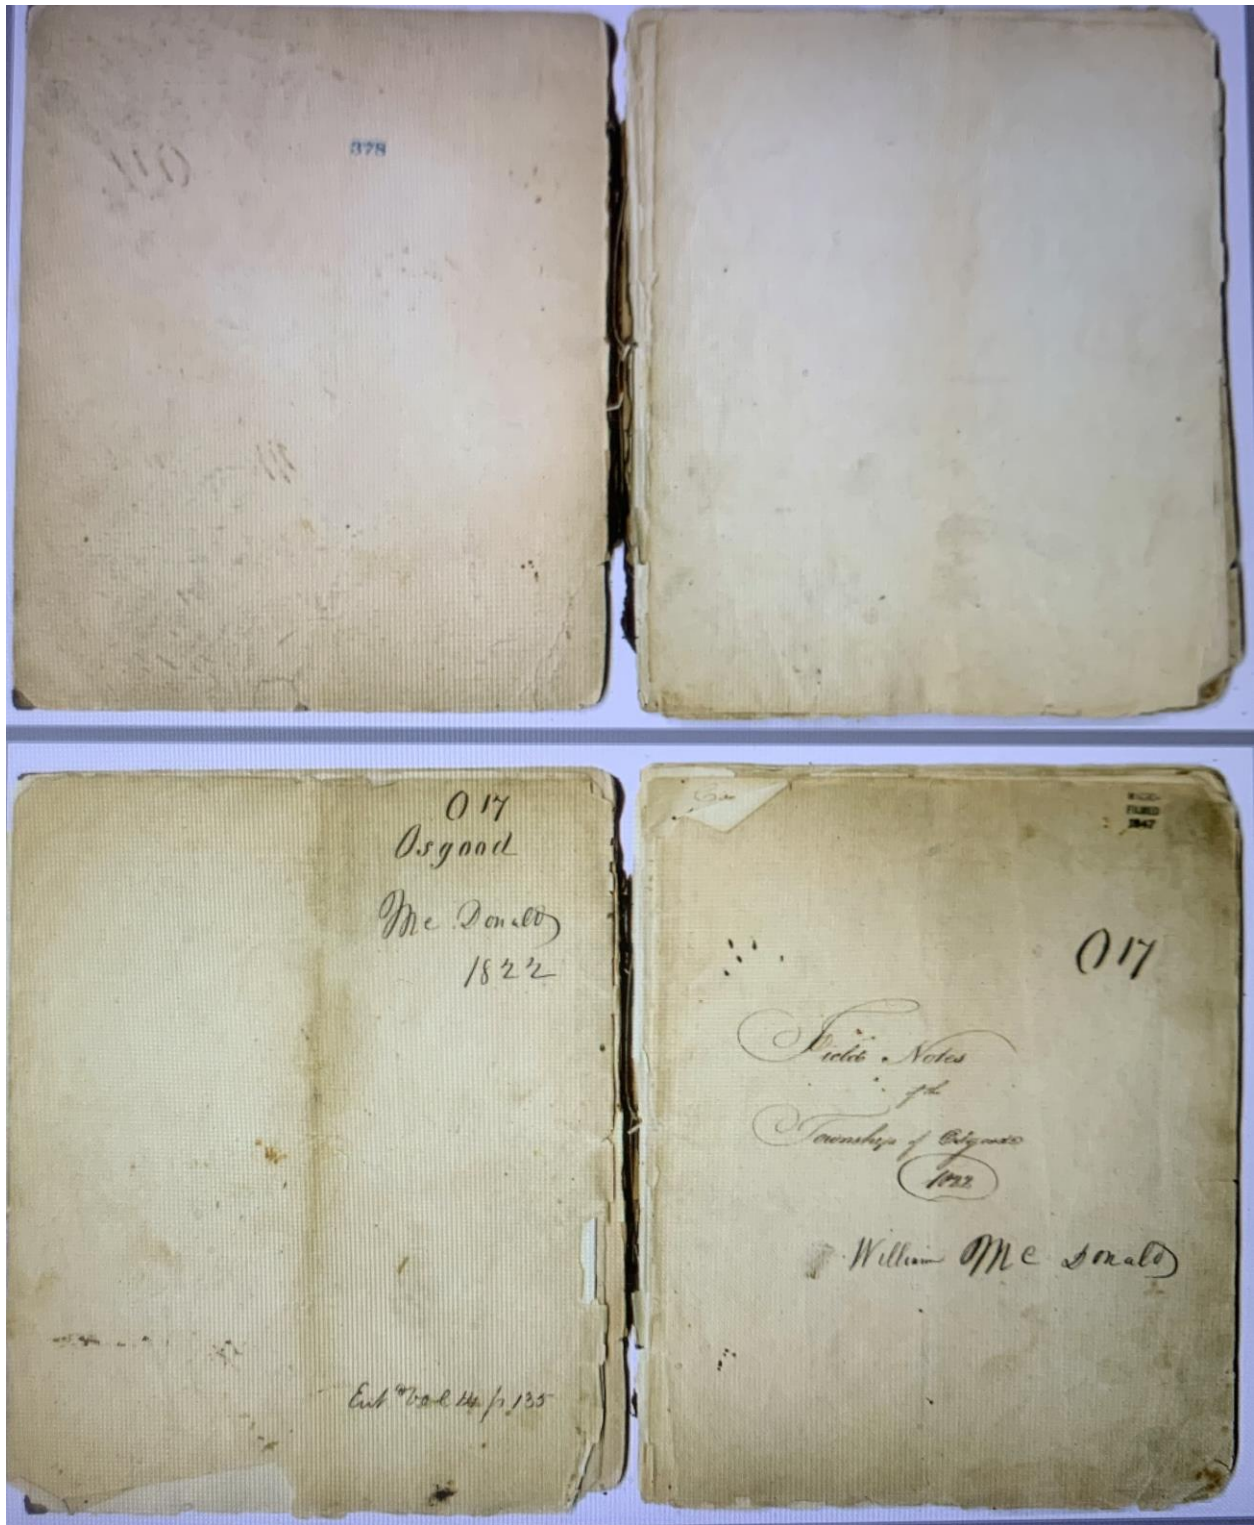

180+ kilometers in the survey routes

12 sets of data for 10 Concession Lines (Conc. 2-11) and the Northern & Southern Boundary Lines

418 lots delineated

Transcription of the text of
Field Notes of the Township of Osgoode 1822
William McDonald

Commencing at the NW. angle of the Second Concession & on the North Boundary of said Township thence on a course with the Concession Line S.16'20' E. admeasuring the Same into Lots

Reference to Field Notes

NB These Remarks are taken as if the whole Township was posted &ca as the new method. where it has been required to Post agreeable alt ?? to the original manner – it has been done ?? and otherwise, as required –

(* in respect to roads)

Finding there was an overflow? over and above a full tenth Concession and that there was a considerable parcel of land taken therein as 200 acres Lots – I judged it proper to lay out the overflow? in Lots and in the Eleventh Concession of 50 acres. So increasing Northerly where is Lots of 80 acres &ca
